

BUILT TO BE A STEP UP.

Lighter Weight. Stronger Impression.

Suburban Composite Stow-Away Steps deliver a cleaner, more confident RV entry experience with durable composite treads, built-in traction, open tread drainage, flexible fit options, and a refined finished look.

COMPOSITE STRENGTH

Durable composite treads help resist everyday wear, support long-term appearance, and stand up to high-traffic RV entry use.

LIGHTER WEIGHT.

Engineered to reduce weight while maintaining dependable support for everyday RV entry.

TRACTION + DRAINAGE

Molded composite treads help support footing, while the open tread design allows water, dirt, and small debris to clear through.

FLEXIBLE RV FIT

Available in multiple step counts, narrow and wide platform options, and standard rise/run configurations to support a wide range of RV applications.

ONE SYSTEM. EVERYDAY ENTRY CONFIDENCE.

Step in with support. Stow with ease. Travel with confidence.

Suburban Composite Stow-Away Steps are designed around the entry point people use every day. From first impression to daily function, they help create a cleaner, more stable, and more intentional RV entry experience.

1 SELECT THE FIT

Choose the step count, platform width, and rise/run configuration that best matches the RV entry application.

2 DEPLOY + POSITION

Deploy the steps and confirm exterior clearance, ground contact, and proper entry alignment before use.

3 STEP IN + STOW

Use the steps for everyday RV entry, then fold and stow when it is time to travel.

FEATURES AT A GLANCE

- Durability Underfoot**
 Composite tread construction helps resist everyday wear while supporting a clean, long-lasting entry appearance.
- Traction That Works Through the Mess**
 Molded texture and open tread drainage help support footing while letting water, dirt, and debris pass through.
- Engineered to Carry Confidence**
 Weight-conscious construction delivers dependable support with a 500 lb. load limit and RVIA RVEC-1 compliance.
- Fit Flexibility Built In**
 Multiple widths, step counts, and rise/run configurations help match the right step to the right RV entry application.
